**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

Este informe contiene información muy importante sobre su agua potable.  
Tradúzcalo o hable con alguien que lo entienda bien.

**UNSAFE WATER ALERT CANCELED**

**For customers in River Island Territory #1. This does not apply to customers in River Island Territory #2.**

Customers of DEL ORO RIVER ISLAND TERRITORY #1 were notified on July 9, 2024 of a problem with our drinking water and were advised to stop using the water for drinking or cooking due to concerns with contamination following mainline breaks caused by a construction crew working on the golf course. We are pleased to report that the water passed bacteriological testing and that it is no longer necessary to use bottled water for drinking and cooking. In addition, since shutting down the wells that were out of compliance with primary drinking water standards and implementing the surface water treatment plant, the most recent sampling for nitrates in the distribution system conducted on July 26, 2024, showed non-detectable results for nitrate. We apologize for any inconvenience and thank you for your patience.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
